PHASE 2 – REQUIREMENT ANALYSIS

Project Title

LegalEase – AI-Powered Legal Document Generator

1. **Introduction**

Requirement analysis identifies the basic requirements needed to develop the LegalEase system.

2. **Functional Requirements**

The system should:

* Accept document type, parties, terms, and dates.
* Generate legal documents using Gemini AI.
* Provide a preview of the generated document.
* Allow users to edit the document.
* Allow downloading in TXT, DOCX, and PDF formats.

3. **Non-Functional Requirements**

* User-friendly interface
* Good performance
* Security
* Reliability
* Easy maintenance

4. **Software Requirements**

* Python 3.10+
* FastAPI
* Streamlit
* Google Gemini API
* python-docx
* FPDF

5. **Input Requirements**

* Document Type
* Parties
* Terms and Conditions
* Effective Date

6. **Output Requirements**

The system generates a customized legal document that can be previewed, edited, and downloaded in TXT, DOCX, or PDF format.

7. **Conclusion**

The requirements identified in this phase provide the foundation for designing and developing the LegalEase system.
