PHASE 4 – PROJECT PLANNING

Project Title

LegalEase – AI-Powered Legal Document Generator

1. **Project Goals**

The main goal of LegalEase is to develop an AI-powered system that can generate customized legal documents quickly and easily.

2. **Project Scope**

The project includes:

* AI-based legal document generation.
* User input for document details.
* Document preview and editing.
* Downloading documents in TXT, DOCX, and PDF formats.

4. **Technology Plan**

The project will use Python, Streamlit, FastAPI, Gemini AI, python-docx, and FPDF.

5. **Development Plan**

The project will be developed in stages, including model selection, system design, core development, API integration, frontend development, testing, and finalization.

6. **Risk Management**

* API failure: Add proper error handling.
* Invalid input:Validate user inputs.
* Formatting issues: Test generated documents in different formats.
* API key exposure: Store the API key securely in an environment file.

7. **Conclusion**

Project planning helps the team organize the development activities, assign responsibilities, manage risks, and complete the LegalEase project systematically.
