PHASE 6 – PROJECT TESTING

Project Title

LegalEase – AI-Powered Legal Document Generator

1. **Introduction**

Testing is performed to check whether the LegalEase system works correctly and meets the required functions.

2. **Testing Objectives**

* Check whether user inputs are accepted correctly.
* Check whether legal documents are generated.
* Check whether the document preview works.
* Check whether editing works correctly.
* Check whether TXT, DOCX, and PDF downloads work.

3. **Error Testing**

The system will also be tested with invalid or incomplete inputs to check whether appropriate errors are handled.

4. **Final Testing**

After completing development, all major features will be tested to verify that the LegalEase system works as expected.

5. **Conclusion**

Testing helps identify errors and ensures that the LegalEase system functions correctly before the final demonstration.
