2. Nandhini. C
3. Sandhiya. S
4. Sandhiya kumari Yadav. A

Department:Bsc computer science
College:St.Anne's arts and science college

1. **Introduction**

LegalEase is an AI-powered legal document generator that helps users create customizable legal documents. It uses generative AI to create documents such as employment contracts, lease agreements, and Non-Disclosure Agreements (NDAs) based on the information provided by the user.

2. **Problem Statement**

Creating legal documents manually can be time-consuming and difficult. Users may not know how to structure different types of legal documents. Therefore, LegalEase aims to provide a simple way to generate customized legal documents using AI.

3. **Brainstorming of Ideas**

1 . AI-Powered Legal Document Generator
2. Legal Text Simplifier
3 . Contract Generator
4. NDA Generator
5 . Lease Agreement Generator

After brainstorming, the team selected LegalEase – AI-Powered Legal Document Generator as the project idea.

4. **Target Users**

* Entrepreneurs
* Startup founders
* Freelancers
* Landlords
* Professionals
* Individuals

5. **Objectives**

The main objectives of LegalEase are:

* To generate customized legal documents using AI.
* To allow users to enter document details, parties, terms, and dates.
* To provide an editable preview of generated documents.
* To support TXT, DOCX, and PDF downloads.
* To provide a simple and user-friendly interface.

6. **Proposed Solution**

LegalEase allows users to enter the required document information. The system sends the information to the backend, where Gemini AI generates the legal document. The user can then preview and edit the document before downloading it.

Workflow:

User Input → AI Processing → Document Generation → Preview/Edit → Download

7. **Expected Benefits**

* Saves time in preparing legal documents.
* Makes document creation easier.
* Provides customizable documents.

* Allows users to edit documents before downloading.
* Supports multiple document formats.

8. **Conclusion**

LegalEase is proposed as an AI-powered solution for simplifying legal document generation. It aims to make the process easier by generating customizable and editable legal documents based on user requirements.
